

Features	Common features:	Interesting, uncommon features:	New food features:
	- Search -recipes - Tag an eat-meal - Add a meal (preferably multiple, high quality pictures)	• Ingredient substitution calculator • Timer • Related-recipes	
	- Ingredients - Instructions - Recipe rating - User reviews and -recipes		• New copy of recipe and edit it (individual ingredients, alter recipe/step)
User perspective			
	- Home bar with search, near common words		
	- Ability to filter and sort search items		
	- Easy to digest instructions with images (in future with)		

This collage illustrates the user interface designs of several food-related platforms, each annotated with yellow sticky notes to highlight specific design elements and user interactions.

- Allrecipes.com**: A desktop view showing a search bar, recipe cards, and a sidebar with user profiles. Annotations include: "price ingredient" (near price dropdown), "cooking time" (near cooking time dropdown), "prep time" (near prep time dropdown), and "rating" (near rating dropdown).
- Food52.com**: A desktop view showing a search bar, recipe cards, and a sidebar with user profiles. Annotations include: "Photo" (near photo dropdown), "Save" (near save button), "Rate" (near rate dropdown), and "Print" (near print dropdown).
- PlanToEat**: A mobile application interface with a welcome screen, "Getting Started" guide, and a "PEANUT EAT" meal plan. Annotations include: "Example of a meal plan to help you get started" (near meal plan image), "Get Started" (near get started button), "Add a Recipe by Hand" (near add hand button), "Clip recipes from your Web" (near clip web button), "Import Recipe from a URL" (near import url button), and "Create Menu" (near create menu button).
- tasteofhome.com**: A desktop view showing a search bar, recipe cards, and a sidebar with user profiles. Annotations include: "Photo" (near photo dropdown), "Rate" (near rate dropdown), "Print" (near print dropdown), and "Email" (near email dropdown).
- TheMealDB**: A desktop site showing a recipe card for "Gorditas Saganaki". Annotations include: "Photo" (near photo dropdown), "Rate" (near rate dropdown), "Print" (near print dropdown), and "Email" (near email dropdown). Another panel shows a "Beef Lo Mein" recipe with annotations: "ingredient pictures are placed weird" (near ingredient images), "instructions have little organization" (near instructions), and "spooning" (near spoon icon).
- DdukDuk**: A desktop site showing a recipe card for "Homemade Fried Rice". Annotations include: "Photo" (near photo dropdown), "Rate" (near rate dropdown), "Print" (near print dropdown), and "Email" (near email dropdown). The sidebar includes "Search our recipes" and "Recent Posts".
- Instant Pot**: A desktop site showing a recipe card for "Instant Pot Chicken Noodle Soup". Annotations include: "Photo" (near photo dropdown), "Rate" (near rate dropdown), "Print" (near print dropdown), and "Email" (near email dropdown). The sidebar includes "Recent Posts" and "Categories".
- UberEats**: A desktop site showing a search bar, filter options, and a grid of food delivery results. Annotations include: "Photo" (near photo dropdown), "Rate" (near rate dropdown), "Print" (near print dropdown), and "Email" (near email dropdown). The sidebar includes "Recent Posts" and "Categories".
